[South Baltimore Peninsula Package Theft Tracking: Non-Victim/Evidence Only \(google.com\)](#)

- We can address this together as a community. There is a joint community safety task force on the peninsula. A major crime issue is package theft because this affects quality of life for residents. There are many repeat offenders.
- We have to start connecting as a community and submit thefts to the police, getting good camera footage to include, we can then narrow down to common repeat suspects and see if they have stolen the felony threshold of \$1500 of goods.
- We now have a form (linked above) that you can submit w/ pictures that will be used for tracking. These forms are then organized by the task force, and then submitted to the police dept.
- The task force will also be writing community impact statements and track these cases through the criminal justice system.
- Canton task force has been very successful with this initiative.

Q: if Mosbey wont prosecute, why bother? We also go to the court commissioner and ask for a warrant. If the \$1500 threshold is reached, the states attorney office will prosecute.
